GEOCHIMICA ET COSMOCHIMICA ACTA

EXECUTIVE EDITORS

PROF. C. W. CORRENS *Sedimentpetrographisches Institut der Universität, Lotzestr.* 13, *Göttingen, Germany*
PROF. E. INGERSON *Department of Geology, University of Texas, Austin* 12, *Texas, U.S.A.*
PROF. L. R. WAGER, F.R.S. *Department of Geology and Mineralogy, The University Museum, Oxford, England*

EDITORS

PROF. L. H. AHRENS *Department of Chemistry, University of Capetown, Rondebosch, Cape Province, South Africa*
DR. S. R. NOCKOLDS *Department of Mineralogy and Petrology, The University, Cambridge, England*
PROF. H. C. UREY, For. Mem. R. S. *University of California, La Jolla, California, U.S.A.*
DR. JOHN VERHOOGEN *Department of Geology, University of California, Berkeley, California, U.S.A.*
PROF. A. P. VINOGRADOV *Vernadsky Institute, Moscow, U.S.S.R.*
PROF. W. A. WAHL, *Observatoriegaten* 8, *Helsingfors, Finland*

INFORMATION FOR CONTRIBUTORS

I. GENERAL

1. Papers should be submitted to the appropriate Executive Editor—Prof. L. R. WAGER for papers from the United Kingdom and British Commonwealth, and for papers in English from Europe; Prof. C. W. CORRENS for papers in German or French; Prof. E. INGERSON for papers from the American continents. Papers submitted for publication will naturally be judged from the standpoint of scientific originality and novelty. Technical details of apparatus used in scientific investigation can, however, be presented in brief notes. Critical comments or preliminary results requiring early publication should be submitted as letters to the editors. Where possible, letters should be confined to 500 words. The preparation of progress reports and review articles will be invited by the editors from time to time. The journal appears as independent and complete numbers, which are combined into volumes of about 300 pages.

2. Only papers which have not been previously published can be accepted. Authors must agree not to publish elsewhere a paper submitted to and accepted by *Geochimica et Cosmochimica Acta.*

3. Fifty reprints of each paper are provided free. Additional copies can be purchased if ordered at the time the first proofs are returned. A reprint order form will accompany first proofs.

II. SCRIPT REQUIREMENTS

1. Scripts must be written in one of the three official languages—English, French or German.

2. The script should be typed (not a carbon copy). The text must be ready for printing and should be carefully checked for errors. Authors will receive proofs for correction.

3. Illustrations should accompany the script, mounted on separate sheets. Line diagrams that require to be redrawn should include all relevant details. Half-tone illustrations should be restricted to the minimum necessary. Photographs should be enlarged sufficiently to permit their clear reproduction, and if words or numbers appear on them, two copies should be sent, one clearly printed and the other without inscription. All illustrations should be provided with descriptive legends, which should be given on a separate sheet. Any lettering on diagrams—other than Greek letters, symbols, etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for inclusion in the journal.

4. References in the text should be given by quoting the author's name and year of publication, i.e. AHRENS (1952). **Full references should be listed at the end of each paper, in alphabetical order, in the following manner:**

AHRENS, L. H. (1952) The use of ionization potentials—I. Ionic radii of the elements. *Geochim. et Cosmochim. Acta* **2**, 155–169.

and should include the full title of the article, standard abbreviated title of the journal, year, volume number and inclusive page numbers.

5. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The essential contents of each paper should be briefly recapitulated in an abstract in English. Such an abstract may, however, be submitted by the author in the language of the original typescript for translation into English by the editorial staff.

6. To conserve space, authors are requested to mark less important portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

7. Indices of refraction should be denoted by the symbols α, β, γ, ω, ε, n and vibration directions by X, Y, Z, O and E.

CONTENTS

NUMBERS 1 and 2

J. D. Jones and J. R. Vallentyne: Biogeochemistry of organic matter—I. Polypeptides and amino acids in fossils and sediments in relation to geothermometry 1

Werner Ricke: Ein Beitrag zur Geochimie des Schwefels 35

N. Herz and C. V. Dutra: Minor element abundance in a part of the Brazilian shield 81

R. M. Carr and W. S. Fyfe: Synthesis fields of some aluminium silicates . . 99

R. Park and S. Epstein: Carbon isotope fractionation during photosynthesis . . 110

K. R. Dawson, J. A. Maxwell and D. E. Parsons: A description of the meteorite which fell near Abee, Alberta, Canada 127

T. Hara and E. B. Sandell: Meteoritic abundance of ruthenium . . . 145

Geochemical Note:

Bartholomew Nagy, Paulette Hamway, G. C. Gagnon and M. Cefola: Separation of n-octadecane-1-C^{14} from asphaltic mixtures by elution chromatography 151

Letter to the Editor:

J. P. Shedlovsky: Cosmic-ray produced manganese-53 in iron meteorites . . 156

NUMBERS 3 and 4

R. R. Marshall and D. C. Hess: Lead from troilite of the Toluca iron meteorite 161

P. Hahn-Weinheimer und F. Rost: Akzessorische Mineralien und Elemente im Serpentinit von Leupoldsgrün (Müncheberger Gneismasse). Ein Beitrag zur Geochemie ultrabasischer Gesteine 165

Joyce C. Lewin: The dissolution of silica from diatom walls 182

R. M. Brown: Hydrology of tritium in the Ottawa Valley 199

F. A. Mumpton and R. Roy: Hydrothermal stability studies of the zircon-thorite group 217

Shunji Umemoto: An example of variation in constituents of hot springs . . 239

Nobuhide Kokubu, T. Mayeda and H. C. Urey: Deuterium contents of minerals, rocks, and liquid inclusion from rocks 247

M. Feller-Kniepmeier and H. H. Uhlig: Nickel analyses of metallic meteorites by the electron-probe microanalyser 257

Brian Mason and H. B. Wiik: The Miller, Arkansas, chondrite 266

The Kyushu, Japan, chondrite 272

The Holbrook, Arizona, chondrite . . . 276

H. Harder: Einbau von Bor in detritische Tonminerale 284

Short Communication:

A. E. Ringwood: Changes in solar luminosity and some possible terrestrial consequences 295

Book Reviews 297

Papers to be published in future issues 300
